

Keynote and Plenary Speakers

Diana W. Bianchi, M.D.,
Director, NICHD

Found in Translation: Insights Regarding Fetal, Maternal and Placental Biology From Clinical Implementation of Cell-Free DNA Sequencing

Matthew Porteus, M.D.,
Professor, Stanford University

*Genome Editing in Humans:
Where Are We and Should There Be Limits?*

Gavin Kelsey, Ph.D.
Babraham Institute

Single-cell Sequencing Reveals Genetic and Dietary Influences on The Oocyte Epigenome

Kathy Niakan, Ph.D.
The Francis Crick Institute

Regulation of Differentiation During Human Preimplantation Embryo Development

Chelsea B. Polis, Ph.D.
Guttmacher Institute

Advancing Reproductive Health Through Science Literacy and Listening

Alejandro Sánchez Alvarado, Ph.D.
Stowers Institute for Medical Research

Understanding the Source of Reproductive Plasticity in Planarians

Janet Rossant, PhD, FRS, FRSC
SickKids

Embryos, Stem Cells and Ethical Concerns
